We are looking for Trainees Software Developers

We are looking for Trainees Software Developers (possibly 3/4). The selected candidates will be trained for 3 to 3.5 months to become good developers capable of working on enterprise-level applications. <u>After the end of the internship, there is a good possibility of full-time employment based on satisfactory performance.</u>

The chosen individuals will work out of the **Southern Software Development Center** for the I.S.P L.M.S, Online Admission System & other Related Future Development.

Required Qualifications & Skills

- BS in Computer Science or related field.
- Excellent communication.
- Good programming concepts.
- Strong competencies in data structures, algorithms, and software design.
- Comfortable with SQL/MySQL queries, and basic database development concepts.
- Understanding of object-oriented programming and principles.
- Good understanding of C#/.Net/.Net Core.
- Knowledge of REST APIs.
- Experience and knowledge of Git.
- A quick learner, with attention to detail, and the commitment to meet deadlines.
- Knowledge of professional software engineering practices
- Good verbal and non-verbal communication skills

What You Will Do & Learn

- Design and create new code to extend our existing products, to standards agreed by the development team.
- Contribute to software design and supporting documentation.
- Work as a part of a development team, following agile methods agreed by the team.
- Understand the development techniques that relate to the delivery of the existing and new products.
- Review code created/editing by other developers, ensuring that the code conforms to coding standards, matches the documented requirements and does not introduce defects.
- Follow agreed and documented coding best practices, ensuring full understanding and development requirements.
- Become involved in ad-hoc tasks as required to achieve team goals.
